Part B. CV SUMMARY (max. 5000 characters, including spaces)

Ricardo is full professor at the Energy Engineering Department of the University of Seville. He obtained his PhD in 2005, and since 2006 he has more than 130 documents registered in Scopus and more than 60 publications in international congresses since 2007.

Among the associations that he has belonged are: American Chemical Society; founding member of the European Biomass Research Network (EUBREN) and the European Biomass Association Industry (EUBIA); member of SDEWES center (Sustainable Development of Energy Water and Environment). His current research metrics are h-index: 33(Scopus) and 37 (Google Scholar) and 30 since 2017 and i10-index 76 (Google Scholar), 69 since 2017. The total number of citations is +4000 in Google Scholar and +3000 in Scopus, with an annual average of cites in the last five years (2017-2021) of +600(Google Scholar) and +450 (Scopus) per year. He has been director of 6 doctoral theses and currently directs another four. He has participated in more than 60 projects in collaboration with the industry he has 9 patents.

International collaboration. He has participated in 9 European projects, being PI of the University of Seville in 7 of them and he has coordinated the H2020 Project SOCRATCES, GA 727348, (2018-2020, € 4 975 402,50) developing a novel concept of thermochemical energy storage system based on Calcium looping to integrate into concentrating solar power plants. He has also coordinated USE participation in three Marie Curie Skłodowska program projects, Researchers' Night EU action in years 2012-2013, 2016-2017 and 2018- 2019. He has also coordinated the USE team's tasks in the projects Low Carbon Economy in Schools, Interreg Sudoe CLimAct (<https://www.climact.net>), and in the Interreg Med Low Carbon Mobility project, Remedio (<https://remedio.interreg-med.eu/>). Besides he has coordinated several Spanish Ministry national projects related to the development and use of new biomaterials for reversible high-performance electrolyzers, diesel particulates abatement or controlled microporous combustion of agriculture residues to control temperature profiles and emissions. He has experience in systems integration, and he has directed projects of biomass, residues or solar technologies (CHP, PS10, PS20, Solaben, Solnova1, 2 and 4). Among other societies, he belonged to EUBREN (European Biomass Research Network), American Chemical Society

(ACS) and Centre for Sustainable Development of Energy, Water and Environment Systems (SDEWES). He also belongs to R&D collaborative Europe/ America international networks as Almacenamiento de Energía Solar para Comunidades Aisladas (ONCYT) (RED 717RT0535), Red Iberoamericana de Eficiencia Térmica Industrial (RIETI) (RED 719RT0062 -Investigador) in the framework of TES systems and Energy efficiency.

In the period 2012-2014, he was the director of the Technology Transfer Office of The University of Seville with a relevant activity regarding IPR and collaboration with the productive sector (i.e., it is the second institution of Spain in the number of international patents), where he was in charge of all IPR activities, and he participated and was a member of all the relevant Technology Transfer activities in Spain and International. Since 2014-2022 he has been the director of the Science Dissemination office of the University of Seville (namely Research Promotion and Science Culture Office). He is involved in the most relevant activities and dissemination activities in Spain. Since 2016 he has participated actively in dissemination activities of science in schools, with projects within Youth with Researchers (<https://piiisaandalucia.blogspot.com/>), where some of the projects he mentored, linked to green schools and solar energy received national recognitions and awards.
