Part B. CV SUMMARY (max. 3500 characters, including spaces)

Begoña Calvo PhD. (Female). She is currently Full Professor of Structural Mechanics at the Department of Mechanical Engineering at UNIZAR. since 2010. From 1996 to 2010, she was Associate professor. She achieved his Ph.D. in Computational Mechanics at the University of Zaragoza in 2004. She was a visiting scholar at University of Porto (PT).

Prof. Calvo has published more than 100 papers in ISI journals, 200 conference proceedings, different books chapters, reports and oral presentations. He has been responsible for several research projects and transference to the industry and has supervised thirteen PhD Theses. She is currently Coordinator of the Applied Mechanics and Bioengineering Group (T24-20R) of Aragon Government and member of different national and European commissions related to research. She is member of different national and international scientific associations.

Prof. Calvo has coordinated several research topics in the bioengineering field. She is an expert in computational mechanics with special emphasis in numerical modeling of soft biological tissues (muscle and eye tissues). She also has worked in soft tissue modeling, in

inelastic effects of biological tissues, ocular and abdominal diseases and its interaction with medical devices. Last year she focused her research on experimental methods in biomechanics. Her teaching activities include Continuum Mechanics, Strength of Materials, Structural Mechanics and Advanced Numerical Methods, mainly focused on the characterization and simulation of complex materials and processes.
