

Section A. PERSONAL DATA		Date of the CVA	26/01/2022
Name and Surname	Lucía Tabares Domínguez		
Research's identification number		Researcher ID	K-8768-2015
		ORCID	0000-0002-4027-4044

A.1. Current professional situation

Institution	University of Seville		
Dpt./Centre	Medical Physiology & Biophysics / School of Medicine		
Address			
Phone		email	ltabares@us.es
Professional category	Full Professor	Start date	03/07/2009
UNESCO spec. code	249000- Neurosciences		
Keywords	Motor neurons, spinal muscular atrophy, synaptic transmission		

A.2. Academic education (Degrees, institutions, dates)

Bachelor/Master/PhD	University	Year
Degree in Medicine and Surgery	Sevilla	1981
Doctorate in Medicine and Surgery	Sevilla	1986

A.3. General Quality indicators of scientific production

Six-year research periods: 6

Six-year transfer period: 1

Doctoral thesis directed in last 10 years: 5

Citations: Scopus: 1743; Google Academic: 2570

H-index: Scopus: 23; Google Academic: 26

B. Personal Statement

My training is in Electrophysiology and Imaging, from ion channel recordings to neurotransmission monitorization, to EMG and ERG. During my Ph.D., I discovered that cortical adrenal cells are electrically excitable and characterized the ion conductances by the patch-clamp technique. As a postdoc, I have been working on calcium channels permeation mechanisms with Clay Armstrong at the University of Pennsylvania and the MBL at Woods Hole (USA). During a second postdoc, at the laboratory of David Clapham of the Mayo Clinic (Rochester, MN), I characterized two chloride channels at the cell nucleus membrane. When I came back to Spain, I got a position as Associate Professor and set up my lab where I studied intracellular calcium signaling in neuroendocrine cells. I also collaborated with Guillermo Alvarez de Toledo on the characterization of the last steps of exocytosis with simultaneous capacitance and amperometry measurements. I took a sabbatical in 2001 (15 months) in Palo Alto (CA, USA) at Rinat Neuroscience Corp. (a neuroscience biotech company) where I studied ALS mouse models with electrophysiology techniques. In 2002, I returned to my lab in Spain and started my work in Spinal Muscular Atrophy (SMA) and, since then, I have been committed to investigating the neurotransmission defects and the synaptic morphological alterations in this disease and in others mouse models of synaptopathies. In parallel, and in collaboration with Prof. Bill Betz (Univ. of Colorado, USA), we contributed to the understanding of how active zones organization relates to synaptic transmission regulation. We also performed live imaging of the exo- endocytosis dynamics at motor nerve terminals in synaptophysin transgenic mice. I was promoted to Professor in 2009. The main lines my lab now are i) the molecular mechanisms of motoneuron hyperexcitability, ii) the molecular basis of synaptic functional heterogeneity, iii) the role of SMN –the defective protein in SMA- in local translation, iv) the role of synaptic mitochondria in exo-endocytosis and, v) the potential affectation of the mitochondria in SMA NMJs.

C.3. Participation in R&D and Innovation contracts

“Effect of some antibodies on one or mole mouse model od neurodegenerative diseases” Rinat Neuroscience (Palo Alto, CA, US). 2003.

C.4. Patents

Tabares, L., Lin, J., Rosenthal, A. Title: Methods for Treating Lower Motor Neuron Diseases PCT/US2006/016046; USA application # 60/675393; Priority date: 26 April 2005. Actual owner: Rinat Neuroscience Corporation (Pfizer).

C.6. Awards and Other Professional Activities

1986	Theses Excellence Award from the University of Seville
1984-89	European Science Foundation , Member
1987-89	Fogarty International Fellowship (Fullbright) (NIH)
1990-05	Mayo Alumni Association , Member
1991-95	Marine Biological Laboratory (MBL, Woods Hole, USA, Corp. Member
1991-present	Spanish Physiological Society (SECF), Member
1991-present	Spanish Biophysical Society (SBE) , Council Member (2010-13)
2001-09	American Biophysical Society , Member
2005-present	Spanish Neuroscience Society , Program Committee Member (2009-13)
2007-12	Society for Neuroscience (USA) , Member
2010-16	European Neuroscience Institute (ENI) , Gottingen (Germany), Scientific Advisory Board (SAB)

C.7. Reviewer (Scientific Journals, Institutional grants, and positions)

Research panel of multicenter grants, **German Research Foundation (DFG)**, Ulm Univ. (2016) & Univ. Leipzig/Würzburg (2017) (Germany).

German Research Foundation (DFG), Project evaluator (2018)

Parkinson's UK Projects evaluator (2016); **Muscular Dystrophy UK Project** evaluator (2019)

Agencia Nacional de Evaluación y Prospectiva (ANEP), Projects evaluator.

Instituto de Salud Carlos III, Projects evaluator

Royal Holloway Univ. London (UK), Reviewer for Full Professorship (2016)

Member of evaluating committee for '**Científicos Titulares del CSIC**' (2011).

Member of evaluating committees for '**Titulares y Catedráticos de Universidad**'.

Member of evaluating committees for **Ramón and Cajal y Juan de la Cierva programs**.

Member of evaluating committees for **FPU fellowships** (2014 y 2015).

Associate editor for Frontiers (2016).

Peer-reviewer for more than 20 journals (e.g., Nature Comm., Science, PNAS, J. Neurosci., Hum. Mol. Gen., PlosOne, Neuron, Neurobiol. Disease, J. Neurosci. Meth. Mol. Neurobiol., Eur. J. Neurosci., Exp. Neurobiol., Annals of Neurol., etc.)

C8. Efforts and ability to inspire younger researchers

Teaching Physiology to Medical Students since 1986. Supervision of Masters and Ph.D. theses since 1991. Lecture and coordinator in several Ph.D. Programs in Physiology and Cell Biology at the University of Seville. Teaching at the Course for German students from the University Georg-August (Gottingen, Germany) “A Story of the Nerve Impulse and Synaptic Transmission” (2008-2012).
