#### A.1. Situación profesional actual

Puesto	Profesor Titular de Universidad		
Fecha inicio	2021		
Organismo / Institución	Universidad Complutense de Madrid (UCM)		
Departamento / Centro	Dpto. EMFTEL / Facultad de Ciencias Fisicas / IPARCOS		
País	España	Teléfono	
Palabras clave	Medicina nuclear; Instrumentacion fisica en biomedicina; Equipo médico		

#### A.2. Situación profesional anterior (incluye interrupciones en la carrera investigadora - indicar meses totales, según texto convocatoria-)

Periodo	Puesto / Institución / País
2018 - 2021	Profesor Contratado Doctor / UCM
2017 - 2018	Investigador Contratado con Cargo a Proyecto / UCM
2014 - 2017	Investigador Marie-Curie COFUND / UCM
2011 - 2014	Becario Postdoctoral / Massachusetts Institute of Technology (MIT) / Estados Unidos de América
2010 - 2011	Becario Postdoctoral / UCM / España
2008 - 2010	Becario Predoctoral / UCM / España

#### A.3. Formación académica

Grado/Master/Tesis	Universidad / País	Año
Doctor en Ciencias Físicas	UCM / España	2010
Máster Universitario en Física Biomédica	UCM / España	2008
Licenciado en Ciencias Físicas	UCM / España	2003

### Parte B. RESUMEN DEL CV

Associate Professor at Faculty of Physics of the Universidad Complutense de Madrid. He obtained his PhD in Nuclear Physics in 2010 at UCM, where he continued with a postdoctoral contract until June 2011, when he obtained a grant from the Madrid-MIT m+Vision Consortium to design and lead 2 innovative medical imaging projects from MIT (Boston, MA, USA) with a total budget of more than \$500k which led to 4 PCT patents, 8 publications and 2 NIH (USA) grants. After 4 years at MIT, he obtained in 2014 a Marie-Curie Cofund fellowship at UCM, where in 2018 he obtained a position as "Profesor Contratado Doctor interino" and in 2021 as "Profesor Titular" (Associate Professor as Civil Servant). He has 3 "Sexenios de Investigación" from CNEAI (the last one from 2018-2024).

He has co-authored 56 papers (77% in T1; 14% in D1), and more than 65 conference proceedings in the main nuclear physics and medical physics journals, mostly as first, second or last author. His publications have been cited 1526 times according to Scopus (H-index: 19) and 2548 times according to Google scholar (H-index: 24). He has reviewed 69 articles (Publons) and he is currently guest and topic editor of Applied Sciences (IF 2.47). He has co-supervised 11 PhD Thesis and 29 Master Thesis. He has been teaching at bachelor and master levels at

UCM since 2005, with more than 1000 teaching hours, including several courses of the Master of medical physics of the National University of Costa Rica. He is the director of an international summer school at UCM ("Imagen Médica y Protonterapia") and the international winter school at UCM "Applications of Artificial Intelligence in Science". In 2019 he co-organized the first IPARCOS Workshop "Machine Learning and Applications to Physics" at UCM with almost 100 attendees.

He has participated in more than 50 conferences, with many oral presentations and invited talks. He had an invited talk at the Annual Congress of the European Association of Nuclear Medicine 2016, as he was recognized as one of the 3 best presentations at the European Molecular Imaging Meeting 2016. He has been part of 10 regional and national research projects, and 4 international ones (being co-PI in two of them). In collaboration with the Memorial Sloan Kettering Cancer Center of New York, he participated in a 5-year NIH grant (USA), and since 2020 he also participated in another NIH grant to develop a PET scanner for brain imaging with the Massachusetts General Hospital (Boston, MA, USA). In 2019, he received a "Retos investigación" project from MICINN as PI.

He was the main developer of the PET image reconstruction software FIRST, licensed to the Spanish company Suinsa and distributed worldwide by General Electric, and the Ultrasound image reconstruction software SoSTIR, licensed to the German company iThera in 2019. He also has 4 USA granted patents in PET and Ultrasound imaging, which are in the process of being licensed. In 2020 he lead the X-COV project, to help radiologists with the analysis of Chest X-ray of COVID-19 patients, which was awarded as the master winner of the worldwide UNESCO Hackathon CodeTheCurve. He collaborated in the creation of the Boston division of the Association of Spanish Scientists in USA (ECUSA-Boston), and the International Mentor Program (IMP). As the current director of IMP-Engineering, he is coordinating 37 international mentors from the most prestigious research centers in the world.
