IMPORTANT – The Curriculum Vitae cannot exceed 4 pages. Instructions to fill this document are available in the website.

Part A. PERSONAL INFORMATION

First name	María Coral		
Family name	Del Val Muñoz		
Gender (*)	Female	Birth date	
Social Security, Passport, ID number			
e-mail	delval@decsai.ugr.es	URL Web	
Open Researcher and Contributor ID (ORCID) (*)	0000-0002-2212-2039		

(*) Mandatory

A.1. Current position

Position	Associate Professor/Profesor Titular		
Initial date	14/08/2012		
Institution	University of Granada		
Department/Center	Computer Science and Artificial Intelligence Dpto.	E.T.S.I Informática y Telecomunicaciones	
Country	Spain	Teleph. number	958240468
Key words	Biohealth computing, Artificial intelligence, translational biomedicine, data-mining, Biophysics		

A.2. Previous positions (research activity interruptions, indicate total months)

Period	Position/Institution/Country/Interruption cause
Since 2012	Associate Profesor/Profesor Titular UGR
2006-2012	Assistant Professor/Profesor Contratado Doctor UGR
2004-2005	Researcher/Científico Contratado Genomic Division Deutsches Krebsforschungs Zentrum (DKFZ)
2002-2004	Researcher/Científico Contratado Bioinformatics Dpt. Deutsches Krebsforschungs Zentrum (DKFZ)
2000-2002	Postdoctoral Bioinformatics and Molecular Biophysics Dpt. Deutsches Krebsforschungs Zentrum (DKFZ)
200	Postdoctoral CSIC Estación Experimental Zaidín. Microbiology Dpt
1994-1999	Predoctoral Fellow CSIC Estación Experimental Zaidín. Microbiology Dpt

A.3. Education

PhD, Licensed, Graduate	University/Country	Year
PhD in Science. Biology	Universidad de Granada	1999
Master in Edafology and Vegetal Biology	Universidad de Granada-UNESCO	1999
Degree in Biology	Universidad de Granada	1994

Part B. CV SUMMARY (max. 5000 characters, including spaces)

My **interdisciplinary and international trajectory** with specialization in molecular biology, and computer science started in 1995 with my PhD in molecular ecology and microbiology at the Spanish Research Council (CSIC) EEZ Granada. Afterwards in 2002, I joined the German

Cancer Research Center (DKFZ) first at the Molecular Biophysics and Bioinformatics Dpt. and later at the Division of Genome Analysis. In 2005, I was awarded with a junior-track at the Computer Science Department (DECSAI) (<http://sci2s.ugr.es/>) at the University of Granada and since 2012 I hold an Associate Professorship in this Department where I co-lead the Mining for Modelling Lab (M4MLab) with Dr. Zwir. I am also member of the Andalusian Research Institute in Data Science and Computational Intelligence (DaSCI), University of Granada (UGR) and member of the Biosanitary Research Institute of Granada (ibs.GRANADA).

My **research focuses on Biohealth Computing**, an interdisciplinary field that applies computational methods to healthcare, life sciences, and biomedical research. This field **integrates** biology, health informatics, computer science, and engineering **to improve diagnostics, therapies, and patient outcomes**.

I have led or participated in **national and international research funding**, including 4 EU projects, 4 German Federal Ministry grants, 8 Spanish National projects, and 4 IBS Carlos III projects. My **international collaborations** include DKFZ, Howard Hughes Janelia Research Campus, Washington University School of Medicine (WASHU), and the Human Genetics Institute of Universität Ulm, funded by José Castillejo, HHMI Collaborative Program, and DKFZ Gastwissenschaftler.

My research has resulted in **52 JCR publications** (41 Q1 (17 D1), 6 Q2, 5 Q3) in top-tier journals. I have 1,638 citations in WOS (1,572 excluding self-citations, H-index: 22), 1,833 citations in SCOPUS (H-index: 24), and 3,265 citations in Google Scholar (H-index: 28). **72.7% of my JCR articles rank among the top 25% most cited** in their category, and **77.3% are published in top-ranked journals** (CiteScore). I rank 39th globally in InfluScore at UGR (Influratio: 730) and **actively promote open science**, ensuring all publications are in Open Access or institutional repositories.

My research has been **successfully translated into real-world applications**, bridging scientific discovery and societal impact. My work has led to **technology transfer initiatives**, such as the Steinbeis Technology Transfer Center for Genome Informatics in Germany. Additionally, my research has resulted in **two patents**: U.S. Utility Patent (14/737,094) on Scalable Unsupervised Multisource Analysis and a new patent application (P2024300174) for Novel Biomarkers for Early Diagnosis of Malignant Melanoma. I also contribute as a researcher to the TSI-100927-2023-1 project under the CÁTEDRAS ENIA 2022 initiative, **promoting university-industry collaborations in AI research**.

At UGR, I have taught 1,410 hours of undergraduate and 510 hours of master's courses, supervising **3 defended PhD theses** (**5 more expected by 2025-2026, including an Industrial PhD**), 15 master's theses, and 24 undergraduate projects. Beyond research and teaching, I have actively **contributed to scientific evaluation and advisory committees** and served as an expert panelist for ANECA. Since 2019, I have been an interdisciplinary expert evaluator for the European Commission (H2020 framework), focusing on AI applications in biology.
