

**CURRICULUM VITAE ABREVIADO (CVA)**

**IMPORTANT** – The Curriculum Vitae cannot exceed 4 pages. Instructions to fill this document are available in the website.

**Part A. PERSONAL INFORMATION**

First name	Juan		
Family name	Fernández Olivares		

(\*) Mandatory

**A.1. Current position**

Position	Associate Professor (Profesor Titular)		
Initial date	23/07/2003		
Institution	University of Granada		
Department/Center	Computer Science and AI / ETSI Informática y Telecomunicación		
Country	Spain	Teleph. number	675726155
Key words	Automated Planning and Scheduling, Machine Learning, Knowledge Engineering for Planning, Applications of Automated Planning		

**A.2. Previous positions (research activity interruptions, indicate total months)**

Period	Position/Institution/Country/Interruption cause
1996-2003	Profesor asociado (Lecturer)/Universidad de Granada
1992-1996	Software developer/Combisa S.A.

**A.3. Education**

PhD, Licensed, Graduate	University/Country	Year
PhD in Computer Science	Universidad de Granada	2001

(Include all the necessary rows)

**Part B. CV SUMMARY (max. 5000 characters, including spaces)**

PhD in Computer Science from the University of Granada since 2001, associate professor at the same university since 2003 in the area of Computer Science and Artificial Intelligence. He is member of the Intelligent Systems Research Group of the UGR and member of the Data Science and Computational Intelligence (DaSCI) Research Institute of Andalusia (Spain). His research is focused on different areas of Automated Planning and Scheduling, recently with its integration with Machine Learning (developing both Classical and Neurosymbolic approaches), and its application to several real domains such as Intelligent Manufacturing, Emergency Management, e-Tourism, e-Learning, Business Process Management, Medical Informatics, Intelligent Transport and Videogames. He enjoys 20 years of teaching experience with full time doctoral degree, direction of 5 doctoral theses whose authors currently enjoy management positions in technology companies. He enjoys 5 six-year research/transference terms (4 for research, the last granted in 2015-2021 period, 1 for transference). Author of 81 international and national publications (in the field of Automated Planning and Machine Learning in Artificial Intelligence) of which 16 JCRs, 20 international conferences (10 top tier, receiving international awards like best application paper ICAPS2006), 7 national conferences,

8 book chapters, 2 edited books, 2 international competitions (both awarded as winner: International Competition on KE for Planning ICKEPS 2009, International Planning Competition IPC2020), 12 international workshops. He has participated in 15 R&D projects in public national calls (8 as PI, funding of 575.415,68€) and European projects (1 as PI, funding 60K€) all in the field of Automated Planning, and the last two national projects in the field of integration of Planning and Machine Learning. 11 contracts/collaborative projects with companies (8 as PI, funding of 539.746.08) mostly transferring Automated Planning and Machine Learning technology for decision support. He accumulates a total funding of more than one million euros. He is also co-founder of 2 spin-offs in the field of Artificial Intelligence and has received 3 international transfer awards. He has given 5 seminars by invitation in national and international centers. He has made a postdoctoral stay (University of Ulm), has produced 4 publications in international collaboration, in the area of Automated Planning and its applications. He is a member of program committees on a continuous basis at top international conferences such as ICAPS, IJCAI or AAAI, and evaluator on several calls for grants on technological development based on AI and other digital technologies (20 projects in 2020 and 2021) and in SGS consulting (through UGR-OTRI agreement).

#### **Part C. RELEVANT MERITS (sorted by typology)**

##### **C.1. Publications (see instructions)**

**C. Núñez-Molina, P. Mesejo, J. Fdez-Olivares:** A Review of the Integration of Symbolic and Subsymbolic Methods for Sequential Decision Making. Preprint submitted to ACM Surveys, 2023

**Leonardo Jara, Rubén Ariza-Valderrama, Juan Fernández-Olivares, Antonio González, Raúl Pérez:** Efficient inference models for classification problems with a high number of fuzzy rules. Appl. Soft Comput. 115: 108164 (2022).

**Carlos Núñez-Molina, Juan Fernández-Olivares, Raúl Pérez:** Learning to select goals in Automated Planning with Deep-Q Learning. Expert Syst. Appl. 202: 117265 (2022).

**José Á. Segura-Muros, Raúl Pérez, Juan Fernández-Olivares:** Discovering relational and numerical expressions from plan traces for learning action models. Appl. Intell. 51(11): 7973-7989 (2021).

**Juan Fdez-Olivares, Eva Onaindia, Luis A. Castillo, Jaume Jordán, Juan A. Cózar:** Personalized conciliation of clinical guidelines for comorbid patients through multi-agent planning. Artif. Intell. Medicine 96: 167-186 (2019)

**Andres Jimenez Ramirez, Irene Barba, Juan Fernández-Olivares, Carmelo Del Valle, Barbara Weber:** Time prediction on multi-perspective declarative business processes. Knowl. Inf. Syst. 57(3): 655-684 (2018)

**Inmaculada Sánchez-Garzón, Arturo González-Ferrer, Juan Fernández-Olivares:** A knowledge-based architecture for the management of patient-focused care pathways. Appl. Intell. 40(3): 497-524 (2014)

**Arturo González-Ferrer, Annette ten Teije, Juan Fernández-Olivares, Krystyna Milian:** Automated generation of patient-tailored electronic care pathways by translating computer-interpretable guidelines into hierarchical task networks. Artif. Intell. Medicine 57(2): 91-109 (2013)

**Arturo González-Ferrer, Juan Fernández-Olivares, Luis A. Castillo:** From business process models to hierarchical task network planning domains. Knowl. Eng. Rev. 28(2): 175-193 (2013)
